

PROFILE GENOMICS IN BUSINESS 2015

This page about the 2015 edition of the Genomics in Business conference may give you an impression about what the conference has to offer.

Topics

- Big Data & Value: developments, opportunities and partnerships in the breeding, crop protection and seed technology industry
- Developments & trends by the producers and trading organisations
- Consumer marketing: value creation, sustainability and organics
- Input & consumer traits: sustainability & traits
- Technologies & Agribusiness: game-changing biotech technologies challenging Agribusiness Product Development
- Product Development and Value creation outside the seed industry: trends and challenges

During the conference young-, promising- and start-up companies will pitch their business. Furthermore, two separate sessions on intellectual property and regulatory developments will be programmed. Both sessions aim to present recent IP, legal and regulatory developments in an agribusiness context. What are the consequences for the business, and how should the head of the legal, IP and regulatory department, the general counsel, senior company lawyer and/or senior in-house patent attorney prepare their organisation for the challenges ahead?
